## Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

A)

- a) a process with vegetable oil, water, an amine and clay;
- b) a process with vegetable oil and a viscosity reducer.

B)

- c) wherein the viscosity reducer is an oil;
- d) wherein the viscosity reducer is alcohol.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic for A); claim 7 is generic for B).

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Page 3

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

- 2. During a telephone conversation with John Kane on December 4, 2003 a provisional election was made WITH traverse to prosecute the invention of b) and oil as the viscosity reducer, claims 7-9, 14-15, 19-20 and 23-26. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-6, 10-13, 16-18, 21-22 and 27-28 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.
- 3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

## Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 7-9, 14-15 and 23-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over CN 1069432.
- '432 teaches a binder comprising petroleum pitch and vegetable oil (at 50% or less) for sand casting.
- '432 does not refer to the petroleum product as mineral seal oil, but it would appear that the petroleum product of '432 and mineral seal oil are similar materials.
- '432 does not teach specifically that the vegetable oil is corn oil, but vegetable oil would be inclusive of corn oil.
- '432 does not teach the VOC or benzene levels, but it would have been obvious to one of ordinary skill in the art to have optimized these levels through no more than routine experimentation.
- 6. Claims 7-9, 12-15, 19-20 and 23-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Laemmle et al (4522250).

Application/Control Number: 10/072,638

Art Unit: 1762

'250 teaches a coating for casting aluminum that comprises glycerol trioleate, vegetable oil and petroleum oil, the ratio being adjusted to control the viscosity (see Abstract, 2:20-32).

The glycerol trioleate is a source of a fatty acid, oleic acid.

'250 does not refer to the petroleum oil as mineral seal oil, but it would appear that the petroleum oil of '250 and mineral seal oil are similar materials.

'250 does not teach specifically that the vegetable oil is corn oil, but vegetable oil would be inclusive of corn oil.

'250 does not teach the VOC or benzene levels, but it would have been obvious to one of ordinary skill in the art to have optimized these levels through no more than routine experimentation.

## Conclusion

- The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erma Cameron whose telephone number is 571-272-1416. The examiner can normally be reached on 8:30-6:00, alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shrive Beck can be reached on 571-272-1415. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
